16 August 2012

ICUT Release

The recently released version of CAPR 100-1, Radio Communications Management, is a significant update with a multitude of changes throughout the document. This draft has been under development for over a year and a half and is the result of a lot of hard work by the National Communications Team.

The one disconnect in the regulation was the requirement to complete the Introductory Communications User Training (ICUT) course. To fulfill the requirements of the regulation, ICUT will be released on 20 August 2012 in the new CAP Learning Management System (LMS). Wings should discontinue BCUT and ACUT training and instruct their members to complete the ICUT course on eServices (www.capnhq.gov). The MA and TX Wings did an excellent job BETA testing the system and course for us.

LMS can be accessed by logging into eServices and clicking on the "Learning Management System" tab under the "CAP Utilities" heading on the left side of the eServices home page. Once in LMS, click on the "Introductory Communications User Training (ICUT)" course under the "Communications" heading. This will take you to the ICUT course material. Note: This module will not be available in LMS until 20 August 2012.

Thanks for your patience and understanding. We believe this is a great leap forward and will serve not only the Communications community but CAP extremely well. Please let us know if you have any questions or additional concerns.
